

DONDO KUNDAI

About

Software Engineering honours student with strong foundations in software development, data structures, backend systems, and mobile application development. Experienced in building full-stack applications end to end — from database design through to live, deployed production systems — including real payment integration, authentication, and admin tooling. Passionate about scalable software solutions, modern software engineering practices, and problem solving

Education

Eduvos — 2026 – Present

Bachelor of Science Honours in Information Technology (Software Engineering Stream)

- Advanced Software Engineering Principles
- Software Architecture & Design
- Enterprise Application Development
- Research & Emerging Technologies

University of Johannesburg — 2023 – 2025

BSc Information Technology in Computer Science and Informatics

- Distinction in Computer Science 1A (83%)
- Distinction in Computer Science 3B (75%)
- Top 20 Final-Year Mini Project
- African Insights Artificial Intelligence Award

Projects

Magnif — Full-Stack E-Commerce Platform

— React, Tailwind CSS, Node.js/Express, PostgreSQL, Prisma, Docker

Live: magnif.vercel.app

- Designed and built a complete e-commerce platform for a roofing manufacturer, including a variant-aware product catalog, cart, and order system.
- Implemented JWT-based authentication with role-based access control for customer and admin accounts.
- Integrated real payment processing (Paynow), transactional email (Resend), and cloud image storage (Cloudinary).
- Built an admin dashboard with live business analytics, stock and delivery management, and downloadable PDF financial statements.
- Containerized the full stack with Docker and deployed across Vercel, Render, and Neon.

Vantage Volunteer Tracking Platform —

React Native, Expo

Website: [VANTAGE](https://vantage.vercel.app)

- Developed a hybrid mobile and web platform for tracking student volunteering activities.
- Built authentication, attendance tracking, initiative management, and profile management features.

Skills

- **Programming Languages**

- Java
- Python
- JavaScript
- SQL

- Implemented barcode scanning and collaborated within a cross-functional development team using GitHub.

CERTIFICATIONS

- WeThinkCode_ — GenAI Course for Software Engineers (July 2026)
- Cisco Networking Academy — Introduction to Cybersecurity (2025)
