# Kundai Christine Dondo

Software Developer · Web & Mobile

Software Engineering Honours student and BSc IT graduate who builds and deploys full-stack web and mobile applications, from database design and REST APIs to React interfaces and cloud hosting. Has shipped two live client-facing products with real payment and email integrations, and a cross-platform React Native app. Looking for a junior web, mobile or software developer role.

## PROJECTS

### Magnif: Full-Stack E-Commerce Platform

Live: [magnif.vercel.app](https://magnif.vercel.app)

Built for a roofing manufacturer and distributor

- Designed and built a complete e-commerce platform with a variant-aware product catalogue, shopping cart, checkout and order management.
- Implemented JWT authentication with role-based access control separating customer and administrator accounts.
- Integrated Paynow payments, Resend transactional email and Cloudinary image storage in a live production environment.
- Built an admin dashboard for business analytics, stock and delivery management, and downloadable PDF financial statements.
- Modelled the PostgreSQL schema with Prisma ORM for product variants, pricing and order history; containerised with Docker and deployed across Vercel, Render and Neon.

React · Tailwind CSS · Node.js · Express · PostgreSQL · Prisma · Docker

### Nexwell Safety Wear: Client Business Website

2026 · Live: [nexwellsafety.co.zw](https://nexwellsafety.co.zw)

Real-client side project

- Delivered a responsive business website for a safety-wear client, turning client requirements into production-ready features.
- Built the product catalogue, category navigation, contact forms and reusable React components with React Router and Tailwind CSS.
- Developed an Express.js REST API with Resend to securely deliver website enquiries to the client's business email.
- Added CORS, rate limiting, form validation, error handling and environment-based configuration for production reliability.
- Deployed on Vercel and Render, fixed SPA deep-link routing, configured a custom domain, and added SEO and Open Graph metadata.

React · JavaScript · Tailwind CSS · Node.js · Express · REST API · Vercel · Render

### Vantage: Volunteer Tracking Platform (Web & Mobile)

[Project site](#) · University team project

University of Johannesburg Community Engagement

- Developed a cross-platform mobile and web app for tracking student volunteering, with authentication, attendance, initiative management and user profiles.
- Implemented barcode scanning for rapid attendance capture at events.
- Worked in a cross-functional team using GitHub branches and pull requests.

React Native · Expo · JavaScript · GitHub

EDUCATION

**BSc Honours in Information Technology: Software Engineering**

2026 – Present

Eduvos · NQF Level 8 · SAQA ID 120723

- Coursework: Hybrid Mobile Application Development, Front-End and Back-End Technologies and Frameworks, Service-Oriented and Microservices Architectures, Data Mining and Data Administration, Embedded Systems Software, Computer Graphics and Game Development, Research Project.

**BSc Information Technology (Computer Science and Informatics)**

2023 – 2025

University of Johannesburg · NQF Level 7 · Completed

- Distinctions in Computer Science 1A (83%) and Computer Science 3B (75%). Major modules: Computer Science 3 and Informatics 3.
- Top 20 final-year mini project. Awarded the African Insights Artificial Intelligence Award.

**Secondary Education**

2019 – 2021

ZIMSEC O Level (Nov 2019) · Cambridge AS & A Level (Nov 2021)

- O Level: 11 subjects, all grade C or better, including Mathematics (A), English (A) and Computer Science (B).
- AS & A Level: Computer Science, Mathematics and Physics.

Certifications

- Mercor: Introduction to Agents (AI agent evaluation), Oct 2026
- WeThinkCode\_ : GenAI Course for Software Engineers
- Cisco Networking Academy: Introduction to Cybersecurity

SKILLS

|              |                                                                     |
|--------------|---------------------------------------------------------------------|
| Languages    | JavaScript, Java, Python, SQL                                       |
| Frontend     | React, Tailwind CSS, HTML5, CSS3, React Router, responsive design   |
| Mobile       | React Native, Expo, cross-platform development                      |
| Backend      | Node.js, Express.js, REST APIs, JWT authentication, RBAC            |
| Data         | PostgreSQL, Prisma ORM, SQL, schema design                          |
| DevOps       | Docker, Git and GitHub, Vercel, Render, Neon                        |
| Integrations | Paynow, Resend, Cloudinary                                          |
| Practices    | Version control, code review, pull-request workflow, agile teamwork |
